Relamping in no time at all

The SNAPINLITE system from OSRAM makes changing headlight lamps much easier.

OSRAM SNAPINLITE gives vehicle manufacturers a simple way of meeting the need for easier headlight lamp replacement. This new base system enables lamps to be replaced in one simple operation. Just one quarter turn is all it takes for a lamp with OSRAM SNAPINLITE to lock into place and connect to the the electrical contacts. There is no need to connect cables or make any extra fastenings in the engine compartment.

A system of the future

According to ECE regulation R-48, since August 2006 all headlights in vehicle models with new type approvals have had to be installed so that the light source can be replaced with on-board tools by following the instructions in the vehicle manual. OSRAM SNAPINLITE provides a simple and reliable solution.

With halogen lamps H8B, H9B, H11B and H15 in the OSRAM SNAPINLITE family there are now appropriate solutions for all modern headlight functions, giving OEM manufacturers the option of developing user-friendly lights.
